

Press Release

Code for SQLite3: Generate Swift code for SQLite3 Databases

MAGDEBURG — August 10th, 2022

ZeeZide GmbH is happy to announce the release of **Code for SQLite3**, an application for Swift developers.

“Code for SQLite3” is a little macOS application that accepts either [SQLite3](#) database files or SQL source code, and generates Swift source code for them.

This is done for two main use cases: 1) To bundle and access resource data that is available as a SQLite database.
2) To generate highly efficient database access code, e.g. for caching offline-first data.

ZeeZide GmbH
